DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A (appears to be claim 12), drawn to the pressure applying means including a second nozzle for supplying a magnetic suspension on the film, a magnetic force generating means installed adjacent to a lower portion of the first substrate, and a guide rail for guiding the magnetic force generating means to be moveable in a diameter direction of the first substrate as shown in Figure 6 and disclosed on p. 11, lines 2-6 and p. 12, lines 4-8.

Species B (appears to be claims 13 and 15-16), drawn to the pressure applying means including a second nozzle installed moveable in the diameter direction on the film and spraying the fluid on the film from a central portion to the circumference thereof as shown in Figure 8 and disclosed on p. 15, lines 22-24.

*Note: upon election of Species B, a further sub-species election must be made.

Sub-species Bi (appears to be claim 15), drawn to the fluid being air.

Sub-species Bii (appears to be claim 16), drawn to the fluid being nitrogen.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 11 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 1733

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Note rejoinder of species and sub-species will be considered upon the discovery of allowable subject matter, depending on the basis thereof.

3. A telephone call was made to Mr. Sheth on 1/21/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1733

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
